

CERTIFIED GREEN

SandFree®, as a system, is a clean process which produces no dust to contaminate the home or work environment. It uses low VOC, water-based finishes and cleaners for the greenest, cleanest recoating method.

Phase I & III meet U.S. Green Council LEED NC 2.2

Phase IV meets U.S. Green Council LEED NC 2.2.
Phase V (Satin or Gloss) meets U.S. Green Council LEED NC 2.2 requirements. It is a low VOC, and low odor finish. It is an excellent **green** alternative to High VOC, high solvent oil-based finishes. This catalyzed product stands up to athletic, commercial and residential traffic. Despite being "**green**", it remains the hardest urethane we have found.
